

Michel van Roozendaal, Vice President of Service, Controls, Turnkey and Aftermarket for the Climate Solutions Sector (Thermo King and Trane) in the Europe, Middle East, India and Africa Region  
Ingersoll Rand

Michel van Roozendaal is the vice president of service, controls, turnkey and aftermarket for the Climate Solutions sector (Thermo King and Trane) in the Europe, Middle East, India and Africa region for Ingersoll Rand. Based out of Brussels, van Roozendaal is responsible for performing energy audits and delivering high performance building solutions to executives and owners, helping them deliver a strong financial return on investment and helping their buildings become more operationally and energy efficient.

With a career background in controls, exposure to product development, manufacturing and sales, van Roozendaal has been responsible for delivering integrated solutions, typically with a field installation and service organization.

Prior to Ingersoll Rand, van Roozendaal worked at UTC Fire Safety Benelux where he was the managing director. Before this, he had a successful career with Honeywell as a general manager of the cooling and refrigeration business unit and subsequently at Johnson Controls, where he was promoted to vice president in Northern Europe.

vanRoozendaal obtained his degree in aerospace engineering from Delft University in the Netherlands and a master's degree in business administration in marketing, business policy and strategy and corporate finance from the INSEAD in France.
