

## **Rob Bastinck**

**Director of WTH Radiant Cooling and Heating Systems  
based in The Netherlands - Europe and now in India**

Rob Bastinck, based in The Netherlands, has an extensive experience in engineering with large international companies. He holds a BS degree in electrical engineering. With a career background in electrical engineering, manufacturing, sales and international business Bastinck is heading up the highly successful WTH organization.

WTH is the market leader in radiant cooling and heating systems for new construction and renovation of buildings.

For more than 40 years WTH is engaged in development, production, engineering and installation of systems that contribute to low energy consumption and sustainable comfort. During this period it has installed more than 10.000 installations in various buildings from high rise apartment blocks, hotels, schools/universities, stadiums to large office buildings.

With more than 200 persons working WTH is dedicated to high quality radiant cooling and heating systems in floors, walls and ceilings.

WTH was primary focused on the European markets but also has experience in working in the Middle East. Recently a joint venture is initiated with an experienced systems design partner in India.
